

# ABDULLAH SAADY

front end developer

[abdllahsaady@gmail.com](mailto:abdllahsaady@gmail.com)

01044440204

Sadat City, Menoufia, Egypt

Front-End Developer with strong expertise in building responsive, user-centric web interfaces using modern technologies such as HTML, CSS, JavaScript, and React. Skilled in translating UI/UX designs into high-quality, maintainable code while ensuring performance, accessibility, and cross-browser compatibility. Experienced in collaborating with product teams, designers, and backend developers to deliver scalable digital solutions. Passionate about clean architecture, continuous learning, and creating seamless user experiences.

## Education

### Bachelor of Science in Artificial Intelligence at Misr University for Science and Technology (MUST), 6th of October City, Egypt

August 2025 - Present

Grade: 3

Studied core concepts in artificial intelligence, machine learning, data structures, algorithms, software engineering, cybersecurity, and robotics. Completed hands-on academic projects involving full-stack development, automation, and intelligent systems, with a strong focus on practical application and problem-solving.

## Experience

### Front-End Developer at CybHack, Sheikh Zayed, Egypt

November 2023 - November 2025 • [↗](#)

- Developed responsive and modern web interfaces using HTML, CSS, JavaScript, and React. Collaborated with designers and backend teams to deliver seamless user experiences. Optimized performance, accessibility, and cross-browser compatibility. Contributed to UI/UX improvements and implemented reusable components to enhance project scalability.

### Front-End Intern at Tech Solutions, Cairo, Egypt

January 2023 - June 2023 • [↗](#)

- Assisted in developing and testing web applications, worked on HTML, CSS, JavaScript, and React projects, and contributed to improving UI/UX design.

## Internships

### Front-End Development Intern at Tech Solutions, Cairo, Egypt

January 2025 - August 2025 • [↗](#)

- Assisted in building responsive web pages using HTML, CSS, and JavaScript. Implemented interactive UI components with React, improving user experience. Collaborated with the design team to refine UX flows, reducing bounce rate by 15%. Gained hands-on experience in debugging and optimizing web applications.

## Skills

**HTML5 & CSS3:** Proficient in creating semantic, responsive, and accessible web pages with clean and maintainable code. Strong understanding of CSS Flexbox, Grid, and modern layout techniques.

**JavaScript & ES6:** Experienced in building dynamic and interactive web applications, understanding of modern JS features, DOM manipulation, and asynchronous programming with Promises and async/await.

**React.js / Redux:** Skilled in developing scalable single-page applications (SPAs) using React, managing state efficiently with Redux, and implementing reusable components and hooks.

**UI/UX Design Principles:** Ability to translate design mockups into functional, user-friendly interfaces. Strong eye for layout, typography, and color schemes that enhance user experience.

**Version Control / Git:** Experienced in Git workflows, branching, merging, and collaborating in team environments using GitHub or GitLab.

**Responsive & Mobile-First Design:** Expertise in building applications that adapt seamlessly across devices and screen sizes, ensuring optimal user experience on mobile, tablet, and desktop.

## Projects

### Ms. Esraa Fathy Platform (LMS) • [↗](#)

Developed a dynamic educational platform for course management and student assessment. Features include role-based access control (Admin, Instructor, Student), automated quizzes, and real-time progress tracking.

Skills Used: PHP (Laravel), MySQL, JavaScript, HTML5/CSS3, Git.

### Integrated ERP System for "Filter Store" • [↗](#)

Designed and developed a comprehensive ERP solution tailored for a water filter company, fully integrated with a customer-facing Android application and an e-commerce store. The system centralizes business operations and ensures real-time data synchronization across all platforms using RESTful APIs.

Key Features:

Inventory & Sales: Real-time tracking of units, cartridges, and spare parts stock.

CRM & Maintenance Cycles: Automated scheduling system for periodic filter replacements and service reminders.

Order Management: Centralized processing of orders received via the Android App and Web Store.

API Integration: Secure data exchange between the mobile app, store, and the central database.

Skills Used: PHP (Laravel/Native), MySQL, REST API, Database Architecture, System Analysis.

## Languages

**Arabic** - Native

**English** - Conversational

## Certificates

### eWPTX from cybhack

November 2025 • [🔗](#)

eWPTX is an expert-level, fully practical certification for web application penetration testing, strictly focused on advanced exploitation and WAF evasion techniques.

It validates your ability to bypass sophisticated security mechanisms and manually exploit complex vulnerabilities that automated tools often miss.

### OSWE from cybhack

November 2025 • [🔗](#)

OSWE (Offensive Security Web Expert) is an advanced certification focused strictly on white-box testing, requiring you to audit source code to identify critical vulnerabilities.

It validates your proficiency in automating attacks by writing custom scripts to exploit logic flaws and bypass authentication without relying on automated scanners.

### Front-End Specialization from cybhack

December 2025 • [🔗](#)

Focused on integrating security concepts into the frontend development lifecycle (SDLC), covering the following key areas:

**Client-Side Security:** Mastered browser security mechanisms (SOP, CORS, X-Frame-Options) and network security protocols (HTTPS/TLS).

**Vulnerability Mitigation:** Identified and remediated common web vulnerabilities, specifically Cross-Site Scripting (XSS) (Stored, Reflected, DOM) and CSRF.

**Secure Implementation:** Applied secure authentication flows (JWTs), managed sensitive data storage (Cookies, Local Storage), and practiced secure framework usage.

**System Hardening:** Implemented Content Security Policy (CSP), strict input validation, and the Principle of Least Privilege to reduce the attack surface.

**Tooling & Auditing:** Utilized dependency scanning (npm audit), static code analysis, and browser developer tools for real-time security monitoring.

**Certificate Closing Statement:** "...Consequently, the trainee is granted this certificate in recognition of completing all training elements, validating their ability to develop secure frontend applications."
